I only have a hard copy of the paper. It is on page 13A and is a graphic showing Tier Two Emergency and Hazardous Chemical Inventor - Reporting Period: January 1 to December 31, 2012, Printed April 18, 2013.

Facility Name: Adair Grain, Inc DBA West Fertilizer, Co.  
Chemical Name Ammonium Nitrate  
Amount 270 tons.

David

I found the second one and sent it to all of you. The second tier 2 does not contain ammonium nitrate. Where is DMN reporting that. I can't find any copy of another Tier 2 report with ammonium nitrate.

David-

Though Tier 2 reporting is required by EPCRA and EPA does enforcement if facilities do not file them. The State and Locals receive them. For Texas, I would send folks the following link. We were able to find the 1st report through E Plans which is not the official repository for the data. Eric any luck on finding the second one?

Several reporters are asking about an online database where they can locate facilities storing ammonia anhydrous and ammonia nitrate. Does one exist? Is there a SIC code for fertilizer operations and is it public?

David
